Subject: Duck Slough/Thousand Oaks/Trinity Oaks Flood Control Project

**Ms. Jolly,**

Thank you for meeting with Doug Lines and myself on February 21, 2014 to discuss our concerns about the Duck Slough/Thousand Oaks/Trinity Oaks Flood Control Project. Your explanations and responses to our questions were very helpful in addressing our concerns about the project as it pertains to Oak Ridge Subdivision.

Oak Ridge Homeowners' Association is requesting a letter from Pasco County that confirms the understanding between us on the following issues:

1. The BMP 1A Project area and its affect on the Oak Ridge Canal and Duck Slough within Oak Ridge boundaries during storm events will have no negative consequences to the residents of Oak Ridge Subdivision.
2. The Duck Slough/Thousand Oaks/Trinity Oaks flood control project included sufficient documentation from SWFWMD, Army Corps of Engineers, and other parties that no negative consequences would be presented to the Oak Ridge Subdivision during the operation of BMP 1A.
3. The Oak Ridge Homeowners' Association will be notified of any proposed changes to the operation or control of BMP 1A by Pasco County or any other agency having jurisdiction over the operation or control or BMP 1A.

Thank you again your help.

Sincerely,

David Rosin – President
